

DiTarando SCULPTOR

Thank you for your interest in DiTarando sculpture.

I do a wide range of interior and exterior sculpture, including functional and often humorous pieces. Animal art is my first love and I am continually experimenting with detail, texture and posture in order to accurately capture each creature's spirit. I also enjoy shifting my energies to functional projects, weathervanes, birdbaths and gates, most with an organic flair. My sculptures adorn many gardens, houses, and museums.

DiTarando sculptures are constructed of weatherproof non-ferrous metals, such as copper, bronze and stainless steel, using a combination of three techniques — welded fabrication, die forming and casting. The work consists of reproducible pieces, editions, series' and original one-of-a-kind sculpture. A further explanation of these classifications can be found at www.ditarando.com. Each sculpture is hand-crafted and availability can change overnight.

As a result, price and delivery estimates are subject to change. I will release a final cost assessment only after I have received customer commitment.

My latest inspiration is gate design and construction. Gates can vary in size and shape, be used indoor or outdoor, and reflect any number of themes. Constructed of welded-fabricated cast bronze, copper and stainless steel, my gates are durable and completely maintenance free. Several gates are currently under development in the studio.

Take a moment to visit my website, www.ditarando.com, for a new and unique experience in metal sculpture. A wide variety of my designs are showcased, often photographed in natural settings in order to capture their original beauty and grace. Please visit periodically and check out any new collections. If you have questions, feel free to call or e-mail me anytime.

Roger DiTarando

*Tax, crating & shipping charges will be added to every order.
Costs are determined based on sculpture size and weight, and delivery location.*
